

3-MONTH ONLINE COURSE

HR & Finance: From Fundamentals to Industry-Ready

A structured, practical program designed for early professionals, graduate students, and career-changers — built to bridge the gap between academic learning and real-world HR-Finance roles.

01	02	03
Foundation Phase	Intermediate Phase	Advanced & Application
Weeks 1–4: Core concepts & frameworks	Weeks 5–8: Applied tools & workflows	Weeks 9–12: Real-world simulations & capstone

Why This Course Matters

The Industry Gap

Most early professionals understand HR or Finance in silos — but today's organizations demand leaders who can connect people strategy with financial outcomes. This integration is a key differentiator in hiring.

What You'll Walk Away With

- Ability to read and interpret financial statements through an HR lens
- Confidence in workforce planning, budgeting, and cost analysis
- Tools and templates used in real corporate environments
- A portfolio-ready capstone project

Program Format & Weekly Rhythm

12 weeks. 2 touchpoints per week. Built around your schedule.

Weekend Recorded Session

60–90 min concept-focused video.
Watch at your own pace before the
live session. Includes slide decks,
templates, and reading resources.

Live Mentoring Session

45–60 min 1:1 or small-group.
Doubt clearing, case discussions,
assignment reviews, and
personalized feedback from an
industry mentor.

Weekly Learning Outcome

Each week ends with a clear,
measurable outcome — a skill
practiced, a tool applied, or a mini
deliverable submitted.

Foundation Phase

Build rock-solid fundamentals across both HR and Finance before applying them in context.

Week 1

Intro to HR-Finance Integration

- How HR and Finance collaborate
- Org structures & reporting lines
- Key shared KPIs

Week 2

Financial Statements for HR Pros

- P&L, Balance Sheet, Cash Flow
- Reading financials with an HR lens
- Headcount cost mapping

Week 3

Compensation & Benefits Basics

- Salary structuring & bands
- CTC vs. gross vs. net pay
- Benefits costing

Week 4

HR Budgeting Fundamentals

- Workforce planning concepts
- Budget vs. actuals tracking
- **Mini Project:** Draft a dept. headcount budget

Intermediate Phase

Move from theory to application — learn the tools and workflows used in real HR-Finance teams.

Week 5

Workforce Analytics

- Attrition, turnover, retention metrics
- Excel/Google Sheets dashboards
- Data storytelling basics

Week 6

Payroll & Compliance

- Payroll processing overview
- Statutory deductions (PF, ESI, TDS)
- Compliance calendars

Week 7

Cost-Per-Hire & ROI of HR

- Recruitment cost modeling
- Training ROI calculation
- HR metrics for leadership reporting

Week 8

HRIS & Finance Tools

- SAP SuccessFactors, Workday overview
- Integrating HRIS with finance data
- **Assignment:** Build an HR cost dashboard

Advanced & Application Phase

Tackle complex, real-world scenarios and synthesize everything into a capstone-ready skill set.

Week 9

Strategic Workforce Planning

- Scenario planning for hiring
- Skills gap analysis
- Long-range headcount modeling

Week 10

Business Partnering Skills

- Presenting to finance leadership
- Influencing without authority
- Stakeholder communication frameworks

Week 11

M&A, Restructuring & Change

- HR's role during mergers
- Cost-cutting vs. talent retention
- Change management basics

Week 12

Capstone Week

- Final project submission
- Peer review & mentor feedback
- Demo presentation + portfolio wrap-up

Tools & Technology Stack

You'll graduate fluent in the platforms HR-Finance professionals actually use on the job.

Excel / Google Sheets

Budgeting, dashboards, workforce models

HRIS Platforms

Workday, SAP SuccessFactors, Darwinbox

Analytics & BI

Power BI, Tableau for HR reporting

Payroll Software

Greythr, Keka, ADP — payroll & compliance

Presentation Tools

PowerPoint, Google Slides for stakeholder decks

Collaboration Platforms

Notion, Confluence for documentation & workflow

Industry Example #1: Reducing Attrition Cost at a Mid-Size IT Firm

The Business Problem

A 1,200-person IT services company was losing 22% of its workforce annually — costing roughly **\$3.2M per year** in recruitment, onboarding, and productivity loss.

How the Course Concepts Applied

- HR analyst built a turnover cost model using Excel
- Identified top attrition drivers via engagement survey data
- Presented a business case to CFO recommending retention bonuses

Measurable Impact

Attrition dropped to 14% within 12 months — saving approximately **\$1.1M**. The analyst was promoted to HR Business Partner.

Industry Example #2: Workforce Planning During Rapid Expansion

The Business Problem

A fast-growing fintech startup needed to scale from 300 to 700 employees in 18 months without blowing its Series B runway.

Application

- HR and Finance co-built a rolling 6-month headcount plan
- Each hire was mapped to a revenue milestone
- Tools: Workday + Excel scenario models

Role of Early Professionals

Junior HR analysts owned data entry, variance tracking, and weekly dashboard updates — gaining direct exposure to C-suite planning cycles.

Industry Example #3: Payroll Compliance Overhaul at a Retail Chain

The Business Problem

A 4,000-employee retail chain faced ₹80L in statutory penalties due to inconsistent PF and TDS filing across 35 state locations.

Course Concepts Applied

- Mapped payroll workflows using compliance calendar templates
- Standardized CTC structures across locations
- Implemented Greythr for automated statutory filings

Measurable Impact

Zero compliance penalties in the following fiscal year. The team reduced manual payroll processing time by **65%**.

Key Skills Demonstrated

- Payroll compliance mapping
- Statutory deduction calculations
- HRIS tool implementation
- Cross-location process standardization
- Finance-HR coordination

Tools Used: Greythr, Excel, Compliance Calendar Templates, Internal Audit Checklists

CAPSTONE PROJECT

Simulating a Real HR–Finance Integration Challenge

Your capstone mirrors an actual business scenario faced by mid–size organizations navigating growth.

Problem Statement

A 500–person manufacturing company is planning a 30% headcount expansion over 9 months. HR and Finance must align on budget, hiring timelines, and risk scenarios.

Your Deliverables

Headcount plan, cost model, compliance checklist, attrition risk analysis, and a 10–slide stakeholder presentation to the CHRO and CFO.

Tools Required

Excel (budget model), Power BI or Google Sheets (dashboard), Workday/Darwinbox simulation, and PowerPoint for the final deck.

Evaluation Criteria

Accuracy of financial modeling (30%), quality of HR recommendations (30%), clarity of presentation (20%), and use of tools (20%).

Career & Job Role Alignment

This course is engineered to make you competitive for high-demand roles at the intersection of HR and Finance.

Target Job Roles

- HR Analyst / People Analyst
- Compensation & Benefits Specialist
- HR Business Partner (Junior)
- Workforce Planning Analyst
- Payroll & Compliance Executive

Skills Progression Map

- 1 Beginner**
Read financials, understand payroll basics, use Excel for HR data
- 2 Intermediate**
Build dashboards, model cost scenarios, interpret workforce analytics
- 3 Job-Ready**
Present to leadership, partner with Finance, manage compliance independently

Resume, Portfolio & Interview Prep

Resume Guidance

- Lead with quantified HR-Finance outcomes (e.g., "Reduced cost-per-hire by 18%")
- Highlight tool proficiency: Excel, Power BI, Workday, Greythr
- List the capstone project as a live portfolio item

Portfolio Assets

- HR cost dashboard (Week 8 assignment)
- Headcount budget model (Week 4 mini project)
- Capstone stakeholder deck
- Compliance calendar template

Interview Focus Areas

- Walk me through a headcount planning process
- How do you calculate cost-per-hire?
- Explain attrition impact on a P&L
- How would you present an HR budget to a CFO?

Common Mistakes Beginners Make

Awareness of these pitfalls puts you ahead of 80% of your peers entering this field.

Treating HR and Finance as Separate Worlds

Every HR decision has a financial implication. Learn to speak both languages from day one.

Ignoring Data Literacy

Modern HR roles require comfort with spreadsheets and dashboards. Don't avoid numbers — practice weekly.

Underestimating Compliance

Statutory errors are expensive and reputationally damaging. Build compliance habits early, not reactively.

Building Generic Resumes

Listing "Excel skills" without context means nothing. Quantify your work — dashboards built, budgets modeled, costs saved.

Skipping the Business Context

HR metrics only matter when tied to business outcomes. Always ask: "What does this mean for the organization's goals?"

Your Roadmap After This Course

Completing this program is a launchpad — here's how to build momentum from Day 1 post-graduation.

The professionals who grow fastest in this space are those who actively connect people decisions to business impact — and can articulate that connection in a boardroom.

Key Takeaways

12

Weeks of structured
learning

Weekend sessions + live
mentoring every week

3

Industry case studies

Real problems, measurable
outcomes, early-professional
roles

1

Capstone project

Portfolio-ready, board-level
simulation

5+

Job-ready tools

Excel, Power BI, Workday,
Greythr, and more

📌 By the end of Week 12, you won't just understand HR and Finance — you'll be able to use both to drive real business decisions and stand out in competitive hiring processes.
